

Proposed topics for June 3 Meeting of Myrtle Beach Camera Club

Adobe Photoshop Elements

By Mike Fleckenstein

Please select three topics that you would like to see covered

- Leveling the horizon in a photo and making corrections to lens distortion
- Adjusting brightness, contrast, hue and levels.
- Taking a piece of one photo and adding it into another photo.
- Inserting text into a photo for Fun & description.
- Fixing a bad spot in a photo using clone, dodge, burn, blur and sharpen.
- Converting batches of photos in a given folder to different names, formats and sizes. All at one stroke.
- How to Crop a section of an image then enlarge.
- Using rulers to size different layers and using grid lines to aid composition.
- Drawing shapes and outlining them to form borders and frames.
- Understanding layers.
- Using Pens, pencils, brushes and erasers to correct or alter an image.
- Understanding image formats. JPG, PSD , GIF, TIFF and RAW
- How to select a section of a photo.
- Red eye correction
